

AIV-VSJ and INGV present:

“Volcanic risk management in highly-urbanized areas: Kagoshima and Napoli”

September 4 at 7.15 PM – Auditorium Europa Mostra d’Oltremare

The event is sponsored by the Italian Association of Volcanology (AIV) and the Volcanological Society of Japan (VSJ), in association with the INGV-Osservatorio Vesuviano. Under the umbrella of the recently signed agreement between AIV and VSJ, the event is aimed at outlining the motivations for improving the bilateral scientific collaborations, to tackle the challenges of some of the largest urbanized areas on active volcanoes. The honorable presence of the Mayors of the cities of Kagoshima and Napoli will open the event. Japanese and Italian researchers and especially young and early career scientists are particularly welcome.

Auditorium Europa Mostra d’Oltremare:

- ✓ Salutation by Presidents of AIV, VSJ and INGV
- ✓ Messages from the city Major of Kagoshima & Napoli
- ✓ Introduction of the volcanological context of Kagoshima city (Nobuo Geshi, Geological Survey of Japan)
- ✓ State of the hazard studies in Sakurajima and other Kagoshima volcanoes (Prof. Masato Iguchi, Sakurajima Volcano Observatory, Kyoto Univ.)
- ✓ Introduction of the volcanological context of Napoli and Campi Flegrei urban areas (INGV-OV/ Roberto Isaia)
- ✓ State of the hazard studies in Napoli and CF area (INGV-OV/ F. Bianco)
- ✓ Collaboration between MANN and Tokyo Archaeological Museum, about archaeological and artistic testimonies of Vesuvio and Mt Fuji eruptions (P. Giulierini; Director of National Archeological Museum of Naples)

Launch of the 2019 Summer School in Stromboli (M. Ripepe)
