## **CoV 10 - THE COLLABORATION OF CITTÀ DELLA SCIENZA**

Within the 10th edition of Cities on Volcanoes (CoV 10) to be held in Naples from 2 to 7 September 2018 The title chosen for VOC 10 "Millennia of Stratification between Life of Man and Volcanoes: strategies for coexistence" wants pay attention to the intrinsic resilience of man to the volcanic risk, in a millenary history of coexistence with volcanoes, which shows how much these have represented, and can represent, a resource as well as a problem. At the same time we believe that communication to the general public and to the school public can also be an added value to the conference. This could be done in collaboration with Città della Scienza in a program of parallel events dedicated to the scientific dissemination of volcanism in Campania and of volcanic risk.

### **1. September 4<sup>th</sup> from 11.00 am to 1.00 pm: Scientific talk for teachers.**

Scientific Talks for teachers. The intent is to tell how since prehistory the Campanian environment and humans have coexisted with volcanic eruptions, as an example of resilience, a very actual topic in dealing with risk mitigation.

The two speakers are: the archaeologist Dr. Pier Francesco Talamo (Parco Archeologico dei Campi Flegrei) expert in study of Prehistoric populations in Campania, and the volcanologist Prof. Guido Giordano (University Roma 3) who studied the Pompei eruption of 79 dC and its impact on the famous Villa dei Papiri in Ercolano
